Aspects of the Anthropocene - Aspekte des Anthropozäns

Online -Ringvorlesung

University of Vienna, summer term 2022:
Public lectures on Tuesdays, 5 - 7 p.m. (CET & CEST)
online via Zoom

To join the lecture series for free, go to www.forum-anthropozaen.com

An interdisciplinary online lecture series on the Anthropocene with national and international speakers, from sciences, social sciences and (visual) arts will examine the Anthropocene from different perspectives.

Online discussion to ask questions after each lecture.

The **Anthropocene** presents challenges to all academic fields. As a new geochronological epoch, it redefines the human relationship to the planet in ecological terms with consequences that are also historical, social and ethical. Bringing together the humanities and the sciences, the Vienna Anthropocene Network comprises scholars from geology, geography, the life sciences, history, philosophy, literary and cultural studies, anthropology and a range of area studies.

The international Forum Anthropocene serves as a platform, which addresses the transdisciplinary topic of the Anthropocene with a special focus on globality, urbanity and rural areas.

Drawing on this broad interdisciplinary base, we will explore new perspectives on nature, culture, society, and technology that the Anthropocene urgently calls for.
